

THE STENCO REPORT

AUGUST 2017

A NEWSLETTER BY STENCO CONSTRUCTION

Since 1997, *Stenco* has provided quality workmanship and professional management for projects of all sizes, including interior build outs, general contracting, design build, and construction management. We use our own skilled labor force and pre-qualified speciality contractors to provide our clients successfully completed projects on time and on budget.

UPGRADING PATIENT CARE FACILITIES AT ST. MARY MERCY

The Starting Point - Pre-Renovation

When it comes to patient safety, St. Mary Mercy Hospital in Livonia doesn't compromise. Consequently, when it came time to renovate 16 of their Intensive Care Unit (ICU) patient rooms, they trusted Stenco to upgrade their facilities to safer and cleaner rooms without unduly interrupting their day to day operations.

The 16 patient rooms, about 250 square feet each, needed updated walls, ceilings, and standard room accessories to

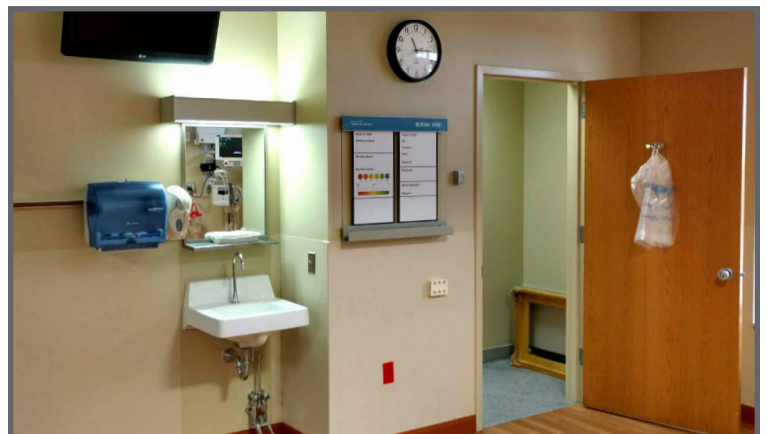

be installed. To update the walls, Stenco's team installed 800 linear feet of Acrovyn® Wall Protection, a heavy duty sheet that is placed over the existing drywall to protect against wear and tear. This wall protection also makes it easier to clean the rooms for each patient. Stenco also installed corner guards and acoustical ceilings in each room.

In order to allow the hospital to continue care for as many patients as possible, Stenco limited their work to two rooms at a time. During construction, Stenco also protected patients from dust and debris by containing the rooms with plastic walls and doors.

Stenco's attention to detail on all aspects of the job ensured that St. Mary Mercy's renovations were finished on time, exceeded expectations, and kept patients safe. Near the completion of this project, St. Mary Mercy was awarded an "A" for patient safety from Leapfrog Hospital Safety Grades. This award recognizes the hospital as being among the safest in the United States – an honor that Stenco is proud to have supported and enhanced with our renovation work on their patient care facilities.

The Finished Work

WELCOME TO THE TEAM!

After spending last summer with Stenco as an Intern, Conner Finnigan joined our team in May as a Field Engineer. A swimmer from Eastern Michigan University, Conner recently graduated with a degree in Construction Management. In his new role he will aid Project Managers and Estimators in their day-to-day operations, including quantity take-offs, document control, schedule updating, and subcontractor coordination. In addition to coaching swimming to the mentally impaired, Conner likes to fish, camp, and float rivers.

SUMMER INTERNS ON BOARD

Bringing three years of commercial field experience to our team, **Erik Mexicotte** is an Eastern Michigan University student majoring in Construction Management. Erik is getting hands-on experience performing quantity take-off, working with subcontractors, putting together estimate proposals, and attending site walkthroughs. Erik graduates in December 2018, and enjoys running and mountain biking in his spare time.

With past experience in industrial construction, **Gannon McLeskey** joined our team to focus on learning the ins and outs of commercial projects. Gannon is a Construction Engineering major with a minor in General Business at Western Michigan University, where he is a member of the intermural hockey team, as well as the Concrete Canoe team.

A fourth year Safety Department Intern, **Jake Nadeau** is working with project teams across multiple jobsites to help ensure we meet and exceed our customer's safety expectations. Jake attends Madonna University, where is pursuing a degree in Occupational Safety, Health, and Fire Science. He is a volunteer firefighter for the City of Monroe and enjoys golfing in his free time.

EMPLOYEE ACHIEVEMENTS

Congratulations to the following employees on their recent achievements and promotions:

Congratulations to **Kevin Inglis**, who has been promoted to Project Engineer. Kevin is currently working on multiple Fordland CCM projects in Dearborn and Allen Park, Michigan.

George Lucero has been promoted to Project Engineer. George is currently working in the automotive, education, and commercial sectors on large scale projects.

Ben Skinner has been promoted to Assistant Project Manager. Ben is currently managing the Fordland CCM account in Dearborn and Allen Park, Michigan.

John Wilson has been promoted to Assistant Project Manager/Estimator. John joined our team in 2015 and is managing multiple self perform projects for various clients.
